Humboldt County Doris Niles Science Fair 2017
Humboldt State University

Monday, March 13 .......................9:00 a.m. - 12:00 noon .......... Project Set-up

Tuesday, March 14 .....................8:30 a.m. - 8:00 p.m. .......... 4 – 8 grades Display Judging

Wednesday, March 15 ...............9:00 a.m. - 12:00 noon ........ Data Entry & Calls for Interviews

Thursday, March 16 ....................9:00 a.m. - 12:00 noon ......... 6 – 12 grades Interviews
                                           4:00 p.m. - 7:00 p.m. ............ Open for Public Viewing

Friday, March 17 .......................9:00 a.m. - 3:00 p.m. ........... Open for School Field Trips
                                           & Public Viewing
                                           3:00 p.m. - 8:00 p.m. .......... Project Removal
                                           7:00 p.m. - 8:00 p.m. .......... Awards Ceremony - Lumberjack Arena

**Purposes of the Humboldt County Science Fair**

- To support California State standards for science.
- To stimulate an active interest in science in young people by engaging them in original investigations and the development of new insights.
- To give public recognition to students for research and investigation in science.
- To foster school/community cooperation in developing the scientific potential of Humboldt County students.

**Humboldt County Science Fair Planning Committee**

Lynne Bryan - Morris School
Heidi Conzelmann - Morris School
John Davis - Community Volunteer
Kim Dedini - McKinleyville Middle School
Loretta Eckenrode - Retired Teacher
David Haller - Freshwater Charter School
Michele Kamprath - Retired Science Teacher
Kevin Lane - Pacific Union School
Melody McGuire - Science Fair Coordinator
Ken Pinkerton - Retired Science Teacher

Nancy Rickard - Community Volunteer
Dan Scofield - St. Bernard’s Academy
Diana Skiles - Jacoby Creek School
Sheryl Steiner - Monument Middle School
Colleen Toste - Rising Stars Foundation/HCOE
Kevin Trone - South Bay Charter School
Julie Van Sickle - Humboldt State University
Heidi Walsh - Jacoby Creek School
Rick Zechman - Humboldt State University
Humboldt County Doris Niles Science Fair 2017
Rules and Regulations

I. Eligibility

A. Students in grades 4 through 12 attending a public or private school in Humboldt County which has filed an “Intent to Participate” form are eligible to enter.

B. All projects must be entered by a School Science Fair Coordinator. Students and parents cannot enter projects directly to the County Science Fair.

C. The School Science Fair Coordinator will be responsible for reviewing all entries from his or her school to ensure compliance with County regulations.

D. Each project must be entered on a separate Entry Form. (See page 21 of this booklet.)

To be eligible to enter the Humboldt County Science Fair, students wishing to do projects involving humans, human tissue, animals, firearms, or hazardous substances are required to complete the approval process outlined in these rules prior to beginning any work.

1. ENTRY FORMS MUST INCLUDE A COPY OF ANY REQUIRED APPROVAL CERTIFICATE. DISPLAY THE ORIGINAL ON THE INSIDE COVER OF THE LOGBOOK.

2. 6th – 12th GRADE ENTRY FORMS MUST INCLUDE A COPY OF THE ABSTRACT. PLACE ORIGINAL IN FRONT OF LOGBOOK.

II. Project Categories

A. Life Science - Animals - zoology, anatomy, physiology, biology, and psychology, sociology, behavioral studies, personal preference surveys. All projects in this category will require a Research Approval Certificate (page 20).

B. Life Science - Botany - plants, fungi, molds, bacteria.

C. Earth/Space Science - minerals, rocks, volcanoes, crystals, geology, weather, gravity, astronomy, stars, and planets.

D. Math/Engineering/Inventions - pure and applied math, geometry, probability, number theory; engineering shapes and structures to test physical laws, projects in which a potentially useful product is created.
E. **Physical Science** - including studies involving **matter** (i.e. density studies, changes of state, evaporation, crystallization, chromatography or other separation techniques), **chemistry** (i.e. chemical reactions and interactions; rust, decay, discoloration; effects of acids and bases; production of gases and precipitates; effects of chemicals on living organisms, biochemistry), **force and motion** (i.e. simple machines, friction, effect of gravity, applications of force to physical systems) and **energy** (i.e. electricity, magnetism, batteries, motors, static electricity and heat, light, sound studies such as absorption or reflection of light/sound; lasers and prisms, musical instruments; waves, insulation experiments).

F. **Consumer Science is NOT** an accepted category for the Humboldt County Science Fair. Teachers are encouraged to redirect student interest in product comparisons to studies of scientific principles. For example, “Which Brand of Golf Ball Goes Farthest?” could become “What Properties Have the Greatest Effect on the Distance a Golf Ball Will Travel; Weight, Size, Surface Texture, etc.?” which would then be in the Physical Science category.

G. Projects with an **environmental emphasis** may occur in all categories. **They should be entered into the category which is the primary focus of the study.** For example, water pollution studies should be placed in Earth Science, energy conservation in Physical Science, effects of acid rain on plant growth in Life Science - Botany, etc.

H. **No projects involving illegal drugs, alcohol, or tobacco will be permitted.**

I. Students have the option to display their work on a backboard (specifications on pages 16-17) or to prepare a multi-media, computer presentation (page 17).

### III. Entry Deadline

<table>
<thead>
<tr>
<th>Entry forms - student names, grades, project titles, approval certificates, and abstract for 6th – 12th grade projects.</th>
<th>Wednesday, March 1, 2017 5:00 p.m.</th>
</tr>
</thead>
</table>

*Humboldt County Doris Niles Science Fair 2017*
IV. Entry Numbers

Schools with an enrollment of 150 students or more may send up to 20 projects to the County Science Fair.

Schools with an enrollment of 149 or less students may send up to 10 projects to the County Science Fair.

• Additional entries may be possible. For more information please contact Melody McGuire, Humboldt County Science Fair Coordinator, at melmcguire@yahoo.com or call 442-0779.

V. Types of Projects Recommended

A. Students in grades 4-5 may enter:

Please Note: Judging criteria favors experiments and observational studies.

1. Experiments

2. Non-experimental projects such as:
   • three-dimensional displays (i.e. the solar system, structure of atoms) or collections based on research;
   • models demonstrating a scientific principle or technology (i.e. what causes erosion or how to build a homemade seismograph);
   • observations of the environment (how plants disperse seeds, what lives in a drop of pond water);
   • data collection projects (how do the number of seeds in different fruits compare, how fast do bean plants grow).

B. For students in grades 6-12, judging criteria is for experiments and observational studies only. Students in these grades must follow scientific methodology.

C. Original, innovative research will be judged higher than projects simply following experiments printed in textbooks or found in other sources for Science Fair projects.
VI. Team Efforts

A. Students in all grades may work on a project individually or with a partner. Only two students to a team.

B. Team projects may be entered in any category. There is no separate category for team projects.

C. It is important to note, however, that 1) criteria for judging projects in this category will include evidence of equal contribution by both students, 2) each student working on the project MUST have his/her own logbook, 3) if students are of different ages, the project will be entered in the grade level of the eldest child.

VII. Two-Year Projects

A. Two-year projects will be admissible only if a new question is asked or an extension beyond the previous year’s work is apparent.

B. The logbook from the original project must be displayed.

C. The project must be prominently labeled “Two-Year Project” and first year results must be indicated separately from second year results.

VIII. Project Removal

A. It is the School Science Fair Coordinator’s responsibility to make certain all projects from his or her school are removed between 3:00 p.m. and 8:00 p.m. on Friday, March 17.

B. Projects may not be removed before 3:00 p.m. on Friday.

C. Projects not removed by 8:00 p.m. on Friday, March 17, will be discarded.
IX. Use of Animals in Science Fair Projects

Animals covered by the regulations below include vertebrates (mammals, reptiles, amphibians, birds, fish) and invertebrates (insects, crustaceans, mollusks, etc.); wild animals including game species, and domestic animals including family pets.

There can be no exceptions to the following requirements.

A. Approval Procedures

1. Students with projects involving an experiment or observation of any living animal must have a qualified Research Advisor who will be responsible for the safe treatment of any animal subject to the student’s study.

2. Before any work on the project begins, the student must make an appointment to meet with a Research Advisor. This person will review all pertinent regulations and advise the student on the safe treatment and/or non-invasive observation of animals involved in the project. S/he will also complete Part 1 of the Humboldt County Science Fair Research Approval Certificate on Page 20.

3. Research Advisors must have the following educational background:

   a. For projects involving vertebrate animals, the Research Advisor must have a doctoral degree in science or medicine (D.V.M., Ph.D., M.D.). It is recommended that Research Advisors review regulations in the federal Animal Welfare Act of 1966 with students (copies of relevant sections are available from the County Science Fair Coordinator).

   b. For projects involving invertebrates, the Research Advisor must have educational experience in science education. It is recommended this person be the School Science Fair Coordinator or the student’s classroom teacher.

4. Projects involving observations of wild animals or the collection or display of any wild animal part, must have clearance for the project from a Department of Fish and Game Control Officer. This approval may be obtained by telephone. Students must submit a Research Approval Certificate indicating the name of the person providing approval, his/her title and the date of the telephone conversation. This documentation must be displayed on the inside cover of the logbook presented at the time the project is set up for judging. (See rules specific to wild animals following this section.)
5. At the initial meeting, students must provide the Research Advisor with all of the following:
   a. a written description of procedures they plan;
   b. a copy of these Humboldt County regulations; and
   c. a copy of the Research Approval Certificate.

6. A responsible adult must meet with the student and the Research Advisor. This person must agree to supervise the student’s work on the project to ensure compliance with the animal care instructions provided by the Research Advisor. This adult supervisor must also sign Part I and Part II of the Research Approval Certificate.

7. A copy of the Research Approval Certificate MUST accompany the student’s Humboldt County Science Fair Entry Form. The original of this form must be the first page of the student’s logbook and be present when the project is set up.

8. Any project not conducted in conformity with these rules and the Humane Laws of California will not be allowed to compete.

**B. Wild Animals**

1. Under Department of Fish and Game Regulations (Section 3005.5), any animal found in the wild is protected. It is, therefore, illegal for students to capture or confine any wild mammal, bird, fish, reptile, amphibian or invertebrate animal for the purpose of a Science Fair project. It is also important that teachers and students are aware:

   - Section 3039 states: it is illegal to sell or to purchase any part of any animal found in the wild. This includes feathers or other body parts from any migratory bird or the carcass, skin or other parts of non-game animals including, but not limited to, endangered species.

   - The only exceptions to this regulation are:
     a) fur from mammals taken legally under the authority of a trapping license;
     b) parts of domestically reared game birds; and
     c) shed antlers from domestically reared animals.
• Students should also be aware these protections extend to marine life. The collection of tide pool animals is prohibited except for those species subject to sport regulations. In the case of these animals, students must obey all Fish and Game sport regulations on limits, opening and closing dates, specific locations and required licenses.

• Game species that are hunted are subject to sport fishing and/or hunting limits and regulations and require the appropriate licenses, proof of which must be included with the student’s logbook.

2. Care should be taken to return animals to their native habitat and to avoid releasing non-native species into a non-suitable environment.

3. Projects using any animal parts (teeth, stomachs, hides, etc.) must have written documentation indicating the source of the animal parts.

C. State Law

1. California State Law and the California Educational Code require:

   a. The comfort of all animals used in any project shall be a prime concern. Animals MUST be obtained from a reliable source and the following basic needs MUST be assured: appropriate, comfortable quarters; adequate food and water; cleanliness and humane treatment; exercise when required for the species of animals used. Students MUST make arrangements to provide these basic needs at all times, including weekends, vacations, and holiday periods.

   b. No vertebrate animal will be subjected to any procedure or condition, including nutritional deficiency experiments, which results, either by intention or negligence, in pain, distinct discomfort, abnormal behavior, injury, or death.

   c. No surgery, including biopsy, will be performed on any living animal.

   d. When planning the project, the student MUST arrange for the humane disposition of all animals involved after the project is completed. This may be done by placing them in an environment where they are assured of continued humane care or by releasing undomesticated species into a suitable wildlife environment. Students MUST NOT perform euthanasia on vertebrate animals under any circumstances. A complete account of the final disposition of all animals used MUST be included in the final report of all projects involving living animals.
e. The basic aim of any project involving living animals should be to increase the knowledge and understanding of life processes. It should not include the demonstration or development of surgical techniques. All projects involving animals must, therefore, have a clearly defined objective which requires the use of animals to demonstrate a biological principle or to answer a specific question.

f. A lower form of life should be selected for the project, rather than a higher form, whenever possible. Students are strongly urged to select invertebrate animals, plants, or tissue cultures. Invertebrate animals are especially suitable because of their wide variety and availability in large numbers.

g. California humane laws specifically forbid the mistreatment or neglect of animals, including animals used in schools and school-sponsored activities. Students, teachers, and supervisors must know and obey these laws. Any student research involving animals MUST COMPLY with the requirements of the California Education Code stated here:

```
HUMANE TREATMENT OF ANIMALS, State of California Education Code Title 2, Division 2, Part 28, Chapter 4, Article 5, Section 51540.

In the public elementary and high schools or in public elementary and high school-sponsored activities and classes held elsewhere than on school premises, live vertebrate animals shall not, as part of a scientific experiment for any purpose whatsoever:

a) be experimentally medicated or drugged in a manner to cause painful reactions or induce painful or lethal pathological conditions; or

b) be injured through any other treatments, including, but not limited to, anesthetizing or electric shock.

Live animals on the premises of a public elementary or high school shall be housed and cared for in a humane and safe manner.
```
X. Use Of Human Subjects in Science Fair Projects

These rules apply to all projects involving human subjects in any of the following:
  • physical activity
  • blood testing
  • tasting or sampling of food or drink
  • surveys of opinions or behaviors

A. Research Advisors

1. In order to protect the health, safety and legal rights of human subjects, the student conducting the project must have a Research Advisor approve his/her plans prior to any work with human subjects. The Advisor will meet with the student and a responsible adult who will supervise student work. Qualifications for Research Advisors vary with the type of project as follows:

a. If the project involves:

   1) a physical activity in any way beyond the scope of any subject’s everyday life (running endurance trials, sitting in hot tubs of different temperatures, studying test performance after sleep deprivation, etc.);

   2) work with human blood; and/or

   3) the ingestion of a food, drink or any other substance in any way beyond the scope of any subject’s everyday life...

...the Research Advisor must be a medical doctor (M.D.).

b. If the project involves:

   1) the ingestion of a food, drink or any other substance completely within the scope of any subject’s everyday life;

   2) a physical activity completely within the scope of any subject’s everyday life (i.e. Does color affect taste? Do different ages have different food preferences? Measuring changes in height before and after sleep, etc.); and/or

   3) the collection of information through a questionnaire or survey...

...the Research Advisor must be the School Science Fair Coordinator or the School Site Administrator.
2. **At the initial meeting, students must provide the Research Advisor with all of the following:**

   a. a written description of procedures they plan;

   b. a copy of these Humboldt County regulations pertaining to human subjects;

   c. a copy of the *Humboldt County Science Fair Research Approval Certificate*; and

   d. the form to be sent to parents for their approval of their child’s participation in the project.

3. The Advisor will complete Part 1 of the *Research Approval Certificate*. A **copy** of this Certificate must be submitted with the County Science Fair Project Entry Form.

4. Research Advisors must assure that each individual human subject will not be exposed to any risk of possible injury either physical, psychological, or social as a consequence of participation in a science fair project.

**B. Parent Permission**

Written permission approving any activity (including tasting or completing surveys or questionnaires) by a student “subject” must be obtained from the parent or guardian prior to the student engaging in the activity. These permission forms must be kept on file, and a copy must be included in the student’s logbook. Simple notification of the questionnaire to be administered is not sufficient.

California Education Code 51513 requires that parents receive notification and provide written authorization prior to student participation in the types of activities mentioned above. The intent of this Section is to protect family privacy and personal beliefs; nonetheless all surveys including those, for example, with questions about television viewing habits, birth weights, etc. must comply with this requirement for parental pre-approval.
C. Surveys

1. See parent permission requirements in Section B, previous page.

2. The data collected from surveys must be presented in such a way that no one can identify the individual who completed a specific survey, including the student administering the survey.

D. Additional Restrictions

1. No bio-medical deprivation studies involving human subjects will be allowed.

2. Any human blood samples used in the project must follow safety procedures for the handling of bloodborne pathogens as stated in the California Occupational Safety and Health Standards, Section 5193. Copies of these guidelines are available from the Humboldt County Science Fair Coordinator. Written documentation that blood samples are free of HIV and Hepatitis B, must be presented with the Project Entry Form. Testing may be done at the Humboldt County Health Department or other medical laboratory.

3. The exhibition of human parts is prohibited except for teeth, hair, and nails. Slides or other samples of human tissue professionally encased by a scientific supply company may be displayed provided proof of source is attached to project or in logbook.

XI. Use of Plants

Care must be taken that no rare or endangered plant species be collected or disturbed for a Science Fair project.
XII. Use of Firearms and Weapons in Science Fair Projects

Students must be at least 12 years old to enter a project that involves the use of a weapon of any kind.

The regulations below govern student use of handguns, rifles, shotguns and other firearms, as well as knives, bows and arrows used in hunting and other similarly dangerous weapons.

A. Research Advisors

1. To ensure the safety of the student and any people or animals in the vicinity of the project, students with projects using firearms or other weapons must have a Research Advisor approve his/her plans PRIOR to using the weapon. Research Advisors for such projects must be the student’s School Site Administrator. The Advisor will meet with the student and a responsible adult who will personally supervise all student work involving the firearm or weapon.

2. Students must provide the Research Advisor with all of the following:
   a. a written description of procedures they plan;
   b. a copy of this page which explains the Humboldt County regulations pertaining to the use of firearms and/or weapons;
   c. a copy of the Humboldt County Science Fair Research Approval Certificate;
   d. Dept. of Fish & Game Hunter Safety Certificate earned by the student; and
   e. Dept. of Fish & Game Hunter Safety Certificate earned by the Adult Supervisor.

3. The Research Advisor must:
   a. research the prevailing ordinances regulating the possession and firing of guns or the shooting of arrows, etc. within the city or county limits in which the student lives and will be working;
   b. inform the Adult Supervisor of all limits and regulations contained in local ordinances and in these regulations;
   c. see and review the student’s Hunter Safety Certificate; and
   d. complete Part 1 of the Research Approval Certificate. A copy of this Certificate must be submitted with the Humboldt County Science Fair Project Entry Form.
B. Protection of Animal Life

Under no circumstances will students be allowed to aim at, shoot, harm or kill any form of animal life in conjunction with any part of a Science Fair project.

C. Recommendation to Pursue Alternate Topics

The Humboldt County Science Fair Committee strongly encourages Research Advisors to redirect student interest to other topics not involving the use of firearms, ammunition or other weapons.
XIII. Use of Hazardous Substances in Science Fair Projects

Students intending to work with substances that may be hazardous must follow the rules below. For the purposes of the County Science Fair, any product labeled “Danger, Caution or Warning” will be considered a hazardous substance. Students using products of this type must submit their experimental methods to the School Science Fair Coordinator for approval. The School Science Fair Coordinator will advise the student of safe handling procedures, safe concentrations of chemicals, concerns about fumes or if eye wear is required for safety. Teachers, students and parents should be aware many chemicals and commercial products commonly used in the home may pose potential health hazards.

A. Research Advisors

1. To ensure the safety of the student and any people or animals in the vicinity of the project, students using hazardous materials in their projects must have a Research Advisor approve his/her plans PRIOR to beginning work on the project. Research Advisors for such projects must be the School Science Fair Coordinator. The Advisor will meet with the student and a responsible adult who will personally supervise all student work involving the substance.

2. Students must provide the Research Advisor with all of the following:

   a. a written description of procedures;

   b. a copy of these Humboldt County regulations pertaining to the use of hazardous substances;

   c. a copy of the Humboldt County Science Fair Research Approval Certificate; and

   d. a copy of the Materials Safety Data Sheet (MSDS) for any hazardous substance with a label including the words ‘danger’, ‘caution’, or ‘warning’ if the substance is used in the Science Fair project.

3. The Research Advisor must:

   a. research the potential hazard and safety guidelines identified on the MSDS for each substance;

   b. inform the Adult Supervisor of potential risks associated with the substance to be used; and

   c. complete Part 1 of the Research Approval Certificate. A copy of this Certificate must be submitted with the Humboldt County Science Fair Project Entry Form, and a copy must be placed in the logbook.
B. Materials Safety Data Sheets (MSDS)

1. Materials Safety Data Sheets are required for all hazardous substances purchased from scientific supply companies (as identified by the General Industry Safety Order 5194). A copy of the MSDS sheet can be obtained at the store where the item was purchased or by writing to the address of the manufacturer of the product.

2. Copies of any MSDS needed must be included in the student’s logbook.

C. Illegal Drugs, Alcohol & Tobacco

1. *Students may not use any illegal drugs, alcohol, or tobacco products for a Science Fair project investigation.*
XIV. Exhibit Display Specifications

A. Backboards

1. All Science Fair backboards must:
   - stand upright (without leaning against other backboards).
   - be labeled by the student with his/her:
     1) name
     2) school
     3) grade level
   - NOT have any items on the table in front of display! Photographs, models, and drawings must be mounted on the blackboard.
   - NOT display ribbons or awards won at school or district science fairs.

2. All projects must be within the following specifications:
   36" wide x 30" deep (no height limit)

   High school projects may be
   48" wide

3. Logbooks must be attached to the project backboard with string or cord at least one meter in length.
   
   a. Logbooks must be hand written, except by advance permission from the County Science Fair Coordinator for special circumstances.
   
   b. The Bibliography listing sources of background information must be behind a clearly marked tab in the student’s logbook. Students are encouraged to gather information from people as well as Internet and books. Dates and times of interviews with people should be noted on the Bibliography.
   
   c. Research approval form and abstract, if required, must be in front cover of logbook.
4. For reasons of safety, it is highly recommended students bring only a project backboard and their logbook to the County Science Fair. **Under no circumstances may students display:**
   - Glass or other fragile or easily breakable items
   - Live cultures (molds, bacteria, etc.) in covered petri dishes or in any other containers
   - Food samples
   - Pills, drugs or medications of any type
   - Live animals (including live insects)
   - Blood or other tissue samples, human or animal
   - Fire or open flames, or the equipment to make them
   - Dangerous chemicals
   - Batteries with open top cells

   **NOTE:** Students may use some of these items if necessary to conduct their experiments, but none can be displayed at the County Science Fair.

Science Fair officials reserve the right to remove any exhibit or any portion of an exhibit that is objectionable or hazardous.

**B. Multi-media Format**

Students may choose to present their project findings using multimedia presentations on their own laptops. Projects in this category must address all the same elements required on the standard backboard (Statement of Purpose, Procedures, Conclusions, etc.).

In addition to the computer presentation, students with multi-media projects are required to display:
1) their logbooks and bibliographies, and
2) a printed copy of the text for the presentation.

**C. Liability**

*Students must be prepared to assume all risks for any damage to their projects. The County Science Fair Committee will not be responsible for losses or for projects not picked up by 8:00 p.m. on Friday, March 17.*
XV. Recognition

A. Project Judging

1. There are two levels of judging.

   a. Display Judging - 4th, 5th, 6th, 7th, and 8th grade students’ work will be judged against the standards outlined on the judging score sheets on pages 23 and 24. Students are encouraged to review these forms before beginning work on their projects. Medals, rosettes, and ribbons will be awarded to 4th and 5th grade students based on these scores.

   b. Interviews - 6th, 7th, and 8th grade students will be interviewed by a second group of judges. Medals will be awarded based on the total of the interview judges’ scores (1/2) and the display judges’ scores (1/2).

2. 9th - 12th grade students will be interviewed on Thursday, March 16. All high school projects are included in one judging category.

3. Projects that do not meet “Basic Requirements” will not be eligible for medals.

4. Judges’ comments will be available for students to pick up on Friday, March 17.

B. Awards

1. The following ribbons are awarded based on the number of points earned:
   - Science Fair
   - Honor
   - Excellence

2. Honorable Mention rosettes are given to all students participating in the interview judging and not receiving medals.

3. 1st, 2nd, and 3rd place medals are awarded for the top projects at each grade level.

4. Winners will be identified on Thursday, March 16. Students will receive their medals at the Awards Ceremony on Friday evening.
C. Special Recognition To Be Awarded

Rotary Club of Eureka Grand Prize
6th-12th grade
“Grand prizes” will be awarded to assist selected students in their travel to Los Angeles to compete in the California State Science Fair. Grand prize winning projects will be selected on the basis of potential for competitiveness at the state level from projects receiving 1st, 2nd and 3rd place awards.

North Coast Unified Air Quality Management District
4th-12th grade
An award of $1,000 will be presented towards student travel to the state competition, and certificates awarded for air quality related projects.

Professional Engineers in California Government (PECG)
4th-12th grade
PECG awards a prize to assist a student in their travel to the State Science Fair.

California Association of Professional Scientists
7th-12th grade
A $100 savings bond will be presented to an “Outstanding Young Scientist.”

The California Native Plant Society (CNPS)
4th-12th grade
The Society presents an award of $50 and a 1-year membership to CNPS. Each year, CNPS recognizes one Humboldt County Science Fair project that investigates some aspect of native plant science. CNPS can also provide contacts with scientists willing to correspond with students about their projects. For more information, contact David Loya at 834-5013 or e-mail to: davidloya1@msn.com northcoast.com/~cnps

Dr. Doris Kildale Niles Perpetual Trophy
4th-5th grade
A trophy will be presented to a young student of promise, and their name will be added to the perpetual plaque displayed at the Humboldt County Office of Education.

Humboldt Botanical Gardens
4th-12th grade
A Certificate of Recognition and a $50 savings bond will be awarded to 6 students within the botanical plant field.

The Redwood Regional Audubon Society
4th-12th grade
The Society awards a student with a membership to the Audubon Society and a $50 award for the study of wild birds.
Humboldt County Science Fair

RESEARCH APPROVAL CERTIFICATE
Humans, Human Tissue, Animals, Firearms, or Hazardous Substances

Mandatory Form

School Name: ______________________________  School Phone #: __________________________

PART I  (Must be filled out PRIOR to beginning any work on project.)

If project involves Humans, Human Tissue, Animals, Firearms, or Hazardous Substances
the Required Research Advisor must be a:

D.V.M., Ph.D., or M.D.
  • animals, vertebrates (mammals, reptiles, fish, amphibians, birds) ...... Doctor (D.V.M., Ph.D., or M.D.)
  • human subjects (involved in activity beyond the scope of everyday life) .......... Medical Doctor
  • human tissue, blood or viruses ................................................................. Medical Doctor

School Coordinator or Administrator
  • human subjects (involved in activity within the scope of everyday life) ....... School Science Fair Coordinator
  • invertebrate animals (worms, starfish, insects, etc)... School Science Fair Coordinator or Teacher
  • firearms or weapons .................................. School Administrator (Principal or Superintendent)
  • hazardous substances ................................................................. School Science Fair Coordinator
  • potential pathogens (including bacteria) ......................................... School Science Fair Coordinator

Part 1: Student’s name: __________________________________________

I certify that I have met with the above student ___________________________________________.
On line above you need printed name of D.V.M., Ph.D., or M.D., Adult Supervisor, School
Administrator, Teacher, or School Fair Coordinator.

I have given him/her clear and specific instructions on safe procedures that must be
followed. The Adult Supervisor named below will supervise the actual work with humans,
animals, firearms, or hazardous substances, and has agreed to be responsible for this
student’s compliance with my instructions and with State law, local ordinance and County
Science Fair Rules.

Part 2: Adult supervisor of actual work will be: __________________________

Signature________________________________________________________________________ Position________________________

Mailing Address ____________________________________________________________________

(PO Box or Street) ___________________________________ (City) __________________ (State) (Zip)

Phone #_____________________________________ Date __________________________________

A copy of this form must accompany Humboldt County Science Fair Entry Form.
Original must also be displayed on inside cover of the logbook.
Humboldt County Science Fair 2017 • ENTRY FORM

Name of School Science Fair Coordinator _______________________________________________________

Phone number* where Coordinator can be reached

Wednesday, March 15, 12:00 noon - 8:00 p.m.

Phone number where Coordinator can be reached

Friday evening, March 17, 8:00 p.m. - 9:00 p.m.

* Please note - Phone numbers requested above are for teacher/coordinators, not students.

Student Name _______________________________________________________ Grade __________

(First Name) (Last Name)

Student Name _______________________________________________________ Grade __________

Project Category (Check one)

_____ Life Science, Animal

_____ Earth/Space Science

_____ Math/Inventions/Engineering

_____ Life Science, Botany

_____ Physical Science

Project Title

(Please no more than 30 letters. Shorten or abbreviate title if necessary to fit limit.)

Brief summary of project purpose or problem statement:

______________________________________________________________________________________

______________________________________________________________________________________

______________________________________________________________________________________

6th-12th grade – Required project Abstract is attached.  □

Check one below. This project involved:

_____ No Approval Certificates required for this project.

_____ Parent permission for students to complete surveys.

_____ Hazardous substances. Approval Certificate and MSDS attached to logbook.

_____ Firearms. Proof of Gun Safety Course attached to logbook.

A copy of any required Approval Certificate MUST accompany this Entry Form.

6th-12th grades - a copy of abstract must also accompany Entry Form.

Return to:

Mel McGuire, c/o Humboldt County Office of Education
901 Myrtle Avenue, Eureka, CA  95501-1294  • Fax: 707-445-7149

Entry form must be received by Wednesday, March 1, 2017, 5:00 p.m.
Abstract Form
6th – 12th grades

An abstract is a brief summary of your work. A good abstract will tell the readers what you set out to do (the question you addressed, or the problem you tried to solve), what you accomplished, and why you believe it is important. The judges will be interested in seeing a short description of your results or conclusions in the abstract.

Example: My project was to determine if surface finish has an effect on the drag of a model rocket. Five model rockets with identical size and shape, but different surface preparations, were constructed. One rocket was left with an unfinished surface, three had surfaces finished to various degrees of smoothness, and the fifth rocket had its surface sealed, primed, sanded, and covered with clear gloss.

Results: The rocket with the clear gloss finish consistently reached the highest altitudes of all 5 rockets, while the unfinished rocket consistently reached the lowest altitude.

Conclusions: My conclusion is that surface finish has an important role in model rocket drag and rockets with carefully prepared surfaces will reach higher altitudes.

NOTE: TWO COPIES REQUIRED - One copy must be placed in front of logbook and one copy must accompany Humboldt County Science Fair ENTRY FORM.
HUMBOLDT COUNTY SCIENCE FAIR PROJECT SCORE FORM

A. Required Research Approval Forms
The Science Fair Committee will pre-screen projects to determine if special approval forms for projects involving animals, human subjects, human blood, firearms or hazardous substances have been submitted.

B. Evidence of Scientific Knowledge

Score

1. FOUND IN LOGBOOK
   • Entries are in student’s handwriting. If done on computer, wording appears
to be his/her own. 0 2 4
   • Origin of idea for project is explained. 0 2 4
   • Work done on all phases of project is recorded as appropriate (dates, times,
places, diagrams). If a team project, each student has a separate logbook. 0 2 4 6
   • Notes or comments on problems, methods, conclusions are included. 0 2 4 6
   • Notes from background reading are present. 0 2 4 6
   • Bibliography and sources of information (written materials, interviews)
are cited. May be on display. 0 2 4 6

2. FOUND ON DISPLAY BACKBOARD (or in computer presentation)
   • Purpose or problem is clearly stated. If experiment, hypothesis is included. 0 1 2 3 4
   • Methods and procedures followed are clearly stated. If a team project,
evidence indicates both members have contributed equally. 0 1 2 3 4
   • For experiments: results in the form of observations, graphs, charts or written
explanations are present. For demonstrations: models, collections or
diagrams are present. 0 1 2 3 4
   • Conclusions that are justified by student observations are presented. 0 1 2 3 4
   • Project is neatly labeled and organized. 0 1 2 3 4
   • Grammar and spelling on backboard are correct. 0 1 2 3 4
   (Do not deduct for spelling or grammar errors in logbook.)

3. OVERALL QUALITY
   • Originality of idea for investigation 0 1 2 3 4
   • Creativity of approach (methods/procedures) 0 1 2 3 4
   • Level of difficulty of task 0 1 2 3 4
   • Relates project to broader scientific principles, real-world applications 0 1 2 3 4

HUMBOLDT COUNTY SCIENCE FAIR PROJECT SCORE FORM

A. Required Research Approval Forms
The Science Fair Committee will pre-screen projects to determine if special approval forms for projects involving animals, human subjects, human blood, firearms or hazardous substances have been submitted.

B. Evidence of Scientific Knowledge, Procedures

1. FOUND IN LOGBOOK
   • Entries are in student’s handwriting. If done on computer, wording appears to be his/her own.
   • Origin of idea for project is explained.
   • Notes from background reading, research are present.
   • Work done on all phases of project is recorded as appropriate (dates, times, places, diagrams). If a team project, each student has a separate logbook.
   • Tables, tally marks or notes used to record preliminary results or thoughts about the project are included.
   • Bibliography is present; sources for information are cited (books, magazines, interviews with people, etc.). May be on display.
   • Abstract accurately summarizes project.

2. FOUND ON DISPLAY BACKBOARD (or in computer presentation)
   • Purpose or problem is clearly stated.
   • Hypothesis is clearly stated.
   • Methods and procedures followed are clearly stated. If a team project, evidence indicates both members have contributed equally.
   • Variables to be controlled and to be manipulated are identified.
   • Observations in the form of graphs and/or charts are presented.
   • Experiment was repeated to establish validity.
   • Written explanation of results are clearly stated.
   • Factors that could have influenced results are discussed.
   • Conclusions are related to the hypothesis and are clearly stated and justified from student’s observations.
   • Project is neatly labeled and organized.
   • Grammar and spelling on backboard are correct.
   (Do not deduct for spelling or grammar errors in logbook.)

3. OVERALL QUALITY
   • Originality of idea for investigation
   • Creativity of approach (methods/procedures)
   • Level of difficulty of task
   • Relates project to broader scientific principles, real-world applications

GRADERS
6, 7, 8
## Science Fair Scoring Rubrics

### 1. Logbook  **0, 2, 4, 6 points**

0 - Not present in any form.
2 - Limited completion of requirements. May be missing some components.
4 - Meets requirement stated.
6 - Exceptional work that goes beyond requirements.

### 2. Display  **0, 1, 2, 3, 4 points**

0 - Not present  Not on board display or in logbook.
1 - Minimal  Unclear or not comprehensive (needs elaboration).
2 - Standard  Clearly stated. Accomplishes purpose of the task.
3 - Good  Clear, and demonstrates good understanding of scientific principles or practices.
4 - Excellent  Clear, comprehensive and demonstrates STRONG understanding of scientific principles or practices (exceptional insights into the nature and resolution of problems encountered).

### Spelling and Grammar

**All Grades**
